FOR IMMEDIATE RELEASE

CPS Energy Lights up H-E-B Science Treehouse With New Electricity Exhibits

San Antonio's CPS Energy has formed a partnership with the Witte Museum's popular and interactive H-E-B Science Treehouse. Together the two have created the CPS Energy Underground, a place for children and adults of all ages to learn about the wonders of electricity.

While the exhibit will continually be updated, the current focus is renewable sources of energy – wind, solar, and water power. “People don't realize you can't store electricity,” says Project Design Manager Dennis Bartz, “You literally have to make it 24/7”. Combining fun with learning, children can rotate a handle to create their own water power or use solar power to operate a toy hummer.

CPS Energy Underground will be open during normal H-E-B Science Treehouse hours and is free with general information into the Witte Museum. Come and see all the Witte Museum has to offer!
