Witte Celebrates the 40th Anniversary of Man Landing on the Moon with Amazing Skies

SAN ANTONIO—In July of 1969, the Apollo 11 was the first manned mission to land on the moon. Join the **Witte Museum** in celebrating the 40th anniversary of the moonwalk as well as the International Year of Astronomy with **Amazing Skies, Noon-5 p.m., Sun., July 19**, where the sky is the limit for exciting hands-on activities.

Experience outer space in the Witte backyard and meet former NASA astronauts Rick Hieb and John Blaha. The entire family can join in on the fun activities including Solar Viewing, Impact Craters, Gravity Gauge, Water Rocket Design, The Sun in 3D, LiveReport Studio, Remote Exploration, Jr. Shuttle Pilot, UV Detector, Rockit Rider, Telescope Demonstrations and HAM Radio Satellites. Explore nebulas, galaxies and eclipses, and learn about the men and women who have traveled in space.

Amazing Skies is held in collaboration with the Urban Science Initiative and is included with museum admission. For more information call 210.357.1910 or visit

www.wittemuseum.org.
